

Find Your Bones

Paleontologists (fossil scientists) can tell a dinosaur by its bones and skeleton. Study the skeletons of the dinosaurs below. Match the letter of the skeleton to the dinosaur in the description.

Tyrannosaurus rex - carnivore; its name means "tyrant lizard."

Triceratops - three horns on its head protected it.

Brachiosaurus - its long neck helped it eat leaves on high branches.

Velociraptor - small carnivore; hunted using a big claw on each foot.

Stegosaurus - had a ridge of plates on its back.
